Risk Assessment Template - Top Ten Risks

|  | Risk statement |  | (Scale 1-100\%) Probability | (Scale 1-10) Impact | Exposure | Mitigation | Contingency | Triggers | Assignee |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| \# | Condition | Consequence |  |  |  |  |  |  |  |
| 1 | The CTO might not be available 50 percent of the time, as required. | The project could be delayed. Incorrect decisions could be made. | 80\% | 9 | 7.2 | Gain commitment to 50 percent of available CTO time. | Prioritize questions to be asked of the CTO. Determine other sources of information. | Start of project | Program manager |
| 2 | Possible denial of service attack. | Non-availability of the system to the customers and end users. | 70\% | 10 | 7 | Use of firewall technology, and procedures for keeping such technology updated. | Use of intrusion detection software to prevent denial of service attacks. Develop, test, and regularly review recovery procedures. | Start of project | IT manager, network manager |
| 3 | Catalog data might require conversion. None is currently planned for. | Reduced ability of the system to access and manipulate the data as required. | 80\% | 8 | 6.4 | Determine extent of problem. If necessary, develop scripts to standardize the format of data. | It might be possible to develop code to access the nonstandardformat data. If not, a migration subproject will be necessary. | When a decision is made about the percentage of nonstandard data and its impact on the system | Product manager |
| 4 | Customer data might require conversion. None is currently planned for. | Reduced ability of the system to access and manipulate the data as required. | 80\% | 8 | 6.4 | Determine extent of problem. If necessary, develop scripts to standardize the format of data. | It might be possible to develop code to access the nonstandardformat data. If not, a migration subproject will be necessary. | When a decision is made about the percentage of nonstandard data and its impact on the system | Product manager |
| 5 | If sales drop, the \$750,000 project budget might be reduced or cancelled. | Project cancellation, delay, or scope reduction. | 50\% | 10 | 5 | No action possible within the scope of the project. | Consider deferring some functionality into later phases of the project. | When a change to the project budget is known | Product manager |
| 6 | Customer data might be incomplete, making analysis difficult. | Reduced ability to analyze customer information to identify best customers. | 80\% | 6 | 4.8 | Determine extent of problem and how significant the data is to analysis. If necessary, consider population of missing data. | Consider cleaning the data extracted from the live system and putting it into Analysis Services. | When a decision is made about the percentage of incomplete data and its impact on the system | Product manager |
| 7 | New data might not be available for searching on a timely basis. | Decisions could be made on the basis of incomplete information. | 90\% | 4 | 3.6 | Schedule incremental updates to the search index as frequently as the technology will allow. | Educate users about FTI behavior. Provide other (non FTI) search mechanisms, such as SQL queries. | Start of project | Development |

| 8 | Contoso, Ltd., staff allocated to the project might become unavailable. | The project could be delayed. | 30\% | 7 | 2.1 | Verify with Contoso, Ltd., management the notice period for their staff. | Verify that Contoso, Ltd., has other staff available with suitable skills in case any of the staff allocated become unavailable. <br> Verify with Adventure Works Cycles that a change in staff is acceptable provided that new members have equivalent skills and a transition period is in place for knowledge transfer. | Start of project | Project manager / customer |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 9 | Sales representative might not be able to state the geographical and statistical data needed. | Unclear or incorrect requirements being coded. | 50\% | 4 | 2 | Ensure that the geographical and statistical data needs are defined in detail and verified with relevant stakeholders. | If any data needs are not clearly stated, consider removing such requirements from the first phase of the project. | When it is known that clear requirements cannot be obtained | Product manager |
| 10 | The existing database administrator might not be available 50 percent of the time, as required. | The project could be delayed. Incorrect decisions could be made. | 30\% | 6 | 1.8 | Gain commitment to 50 percent of available database administrator time. | Prioritize questions to be asked of the database administrator. When possible, determine other sources of information. | Start of project | Program manager |
